

VIP report for Annual meeting of the association - March 20, 2021

The VIP program is gearing up for a potentially busy summer. The first project will be working with 8 sites along the canal for the Potomac River Watershed Cleanup. This will be our 14th year participating in this event.

After that, our focus will be on our continuing effort to slow and hopefully eradicate garlic mustard from sections of the park. Due to very limited support, we are unable to work with more than a few sites along the canal.

We are anticipating requests for installing more benches again this year.

Other projects will include refurbishing all of the bulletin boards in the park, repairing picnic tables where needed, replacing some wayside panels and holding a couple of painting activities.

Of course, we stand ready to help with park needs whenever possible.
